📍 Toronto, Canada

Enthusiastic and results-driven Software Development Engineer with a proven track record of delivering high-quality solutions. With hands-on experience gained through internships and a solid foundation in computer science, I excel in crafting efficient, scalable, and user-centric applications. Armed with valuable insights and technical expertise, I am poised to contribute meaningfully to software development projects.

Professional Experience

Software Development Engineer Intern

2023/01 – 2023/08

MOGI I/O

New Delhi, India

- Spearheaded the development of dynamic applications using JavaScript, showcasing superior proficiency and driving project success.
- Streamlined development workflows by seamlessly integrating CI/CD pipelines with Git, resulting in a 30% increase in efficiency.
- Designed and implemented engaging front-end experiences with React Native and Angular, enhancing user satisfaction.
- Architected efficient APIs with Node.js, contributing to a 25% improvement in application responsiveness.

Software Development Engineer Intern

2022/05 – 2022/11

DYNAPT

New Delhi, India

- Led the creation of functional RESTful APIs using Node.js, enhancing project functionality and scalability.
- Optimized data management with MongoDB and SQL databases, resulting in a 40% reduction in data retrieval time.
- Collaborated effectively within a team environment using Git version control, fostering a culture of innovation.
- Played a vital role in driving project advancement, exceeding project goals and timelines.

Skills

Javascript • React JS • Express JS • Node JS • GIT • Mongo DB • React Native • Redux • SQL • HTML

CSS • Blockchain • AWS • Web3 • Solidity • Docker • Swift • Android

Education

Mobile Application Development and Strategy

2025-2025

Toronto Canada

Blockchain Development Program

2025-2025

George Brown College

Toronto Canada

Master of Computer Applications

2017-2020

Jamia Hamdard University

Toronto Canada

Certificates

React - The Complete Guide (incl Hooks, React Router, Redux)

Introduction to Cloud Computing

UDEMY

IMB

JavaScript Algorithms and Data Structures

FreeCodeCamp

Projects

FitFlex App

Built a cross-platform fitness & workout assistant app using React Native + Firebase, featuring real-time exercise data, AI calorie coach, YouTube workout search, and Google Maps based nearby gym locator.

Social Media Mern App

Developed a Social Media app using the MERN stack: ReactJS for the frontend, NodeJS, ExpressJS for the backend, and MongoDB for data storage.

E-Commerce Mobile Shop

Designed a second-hand phone sales app using ReactJS and Redux, featuring seamless "Add to Cart" functionality.

Smart-Todo

Created a feature-rich TODO app using the MERN stack (MongoDB, Express JS, React JS, Node), incorporating comprehensive functionalities.

News App

Developed a straightforward React News App that fetches real-time news data from a news API and displays it through a React application.

Movie App

Fetch random movies from movie Api and has the functionality to search movie using movie names in the Searchbar
